ABOUT US

Cottage Plastic Ltd. , founded in 2005, is a dynamic company that keeps the philosophy of creating simplicity by designing and manufacturing customized stylish, practical high quality plastic products which are sold worldwide.

Cottage Plastic started as a company that producing plastic items in Israel. Since 2015 the company has increasingly expanded its product line, through its brand name **KlicBox** entirely designed and developed in Israel. Currently products are manufactured in India, Vietnam and China.

With over 25 years of industry experience, our company takes great care in implementing best manufacturing practices and upholding lead times and production deadlines.

PROCEDURE

Recognizing Markets Needs

We are in the market, with the clients & buyers. We are there to understand what the market needs, what is selling and what are the prices.

Designing & Developing

We are studying the products with our design department and leading them to the best design with the best items parameters in order to reach our buying and selling prices.

Contracting With Factory

We select the factories according to their machines capabilities, standard of working and prices. We see the factory as a key part of our activities and we are aware that in order to create a long-lasting cooperation, the process needs to be profitable for both the factory and the company. To make it clear, every project we will do with any factory will be profitable for us only if it runs for long time.

Shipments

All our shipments are going directly from the factory to our clients. We are always buying under F.O.B. terms and we handle the shipments. Usually all our shipments are by 40F HC containers.

Distribution

Our network of clients is covering a big part of the world. We are working for years with most of the customers and we have high reputation. Our customers know they can trust us and they know we supply what we are committed to.

Reputation

We are building our reputation for many years with the factories as well as with our clients. Our reputation is based on our honesty, respectable way of doing business and always do our payments on time.

The way we are working with our production houses is as follow:

- We are developing a project – usually it can be 3 – 6 items in the same range.
- We are finalizing the design including sizes / thickness up to 3D files.
- Introduce the project to the factory by sending the files of the items with our target prices and estimated quantities that we commit for 3 years.
- We sign a contract with the factory.
- Very important: all our items are made exclusivity for us.
- We never pay for the molds.
- We are very well known for our payment policy: we always pay on time and as agreed.

It is important to declare that our relationship with the factories are lasting for many years. We must trust our partners-factories as we are working with them closely and openly.
